DrupalCamp North is an event for software developers, designers and business people from the North of England and across Europe.

Between July 24-26th, around 100 leading people from the Drupal software world will be participating in this high profile event held at Sunderland's high-tech Software Centre and at venues across the city.

Following on from the success of last year's Drupal Camp North East - <http://camp.drupalne.org/>, and previous events in Leeds and Manchester, developers and software community leaders from the North West, Yorkshire and the North East have banded together to create a bigger and better combined event this year in Sunderland.

The event will include more than 20 speakers with discussions and panel sessions, networking opportunities and code sprints featuring some of the leading members of the Drupal software community.

There are a variety of sponsorship packages available for sponsors to present to a targeted audience of corporate clients at the Business Day on Friday and a wider audience of Drupal users, developers and business people on the Saturday and Sunday.

Supporting this fast growing open source software community is a great way for companies to develop brand equity and for individuals to raise their profile or contribute back to the community. There are a wide range of sponsor packages available. For more information or to take up a package, please contact leva@consultanddesign.com.

DrupalCamp North is a community event run on a not for profit basis. All sponsor contributions go to cover event costs with any surplus retained for future community events.

The event is open to all businesses and professionals working in web development or considering web technologies with sessions from beginner to advanced. It will run over three days, with tickets costing £35 including meals. Friday's session is free of charge and is designed for businesses interested in seeing how Drupal and open source software can benefit them. To find out more visit <http://drupalcampnorth.org/>

The money is going through a not-for-profit organisation and is only being used for the purposes of organising Drupal Camp North 2015. Any money that would be left over after closing all costs of the event would become a start up fund for the next years event. In case the next years event wouldn't happen for any reason, the money would be contributed back to the local Drupal community of the North of England.
